

# Thandulwazi Trust

## MATHS AND SCIENCE ACADEMY

# Academic Scholarship Programme

---

The Academic Sponsorship Programme provides scholarships to talented FET-phase historically disadvantaged South African Learners, who are currently learning in a school environment where they will not be able to optimise their talent. This programme (subject to the availability of dedicated, multi-year funding) provides bursaries to talented Mathematics/Science Learners from Grade 10 to 12 and seeks to place these talented young people in St Stithians College.

Mentorship is a key feature of the programme. Thandulwazi Maths and Science Academy Bursary Students at St Stithians College are assigned a Mentor, who together with the Thandulwazi Maths and Science Academy Head, Deputy Head and Programme Co-ordinator, meets with the Student on a regular basis and provides appropriate support on a personal basis.

Potential sponsors of this programme are requested to commit support for a minimum of three years, as it is legislatively required and preferable to ensure that the Learner can complete his/her senior high school education without having to face the uncertainty of whether or not funding is available. Presently in 2020, we have 6 Thandulwazi Academic Scholarship Students attending the St Stithians Boys' and Girls' Colleges.

**“Young people must take it upon themselves to ensure that they receive the highest education possible so that they can represent us well in future as future leaders.”**
